Tensile: Minimum 10 psi  
CLD @65%: 8.0 psi  
Elongation: 45%  
Fire Rating: Passes DOC FF-170 Pill Test

HABU means "higher and better use."  
Future Foam products based on HABU principles maximize resources by recycling them continuously and close-by. When molecules from one product can go back into the same product, without traveling far, that is HABU!

**HABU Principles:**  
Supply recyclable material  
Demand recycled content  
Circulate locally and continuously  
Recognize and promote

## Resort Series

High performance carpet cushion designed for the rigorous needs of the hospitality industry. Future Foam and HABU - your first, not last resort

### Sustainable + Eco-Friendly

- Designed and marketed using HABU principles of optimal resource use
- Manufactured from 90% recycled materials
- Convenient recycling through Future Foam's closed loop program
- CRI Green Label certified for low VOCs
- Contributes to Leed credits
- Made in the USA

### Moisture Barrier Technology

- Protects carpet cushion and subfloors from liquids
- Aids in cleaning by keeping liquids from absorbing into carpet cushion or subfloors

### Advanced Technologies

- Inhibits the growth of mold and mildew
- Engineered for a luxurious comfort underfoot
- Durable in commercial environments
- Sound dampening for noise reduction
- High thermal insulator
